Domain: Δρᾶμα [Drama](#)

Format: Ἑμμετρος [Verse](#)

Aeschylus of Alexandria was a Hellenistic poet of the 2nd century BCE. He is known only from a brief mention in ancient sources, which identify him as an Alexandrian. No further biographical details survive.

He is credited with a single, lost satyr play entitled **Amymone**. His primary significance lies in being a named author of a satyr play from the Hellenistic period, evidencing the genre's limited production beyond classical Athens. The choice of the Argive myth of Amymone suggests an engagement with foundational legends through the lens of Alexandrian poetics. As a namesake of the great tragedian Aeschylus, he represents a later, scholarly interaction with archaic dramatic forms.
