Period: *Κλασική* [Classical](#)

Dialect: *Ἀττική* [Attic](#)

Format: *Ἐπιστολή* [Epistle](#)

The name Thrasybulus is associated with notable Athenian historical figures, not a known epistolary author from the 4th–3rd century BCE. The most prominent is Thrasybulus, son of Lycus, a general and democratic leader instrumental in overthrowing the Thirty Tyrants and restoring Athenian democracy in 403 BCE. Another is Thrasybulus of Calydon, a general active in the early 4th century BCE. Neither is attested as an author of epistles.

No epistolary works are attributed to a Thrasybulus from this period in authoritative sources. The extant records concerning individuals named Thrasybulus document political and military actions, not literary production.

The historical significance of the name lies entirely in the political-military history of classical Athens, particularly the restoration of democracy. While metadata suggests an epistolary author, no such figure or corpus is verified by standard scholarly sources on classical antiquity.
