

Μένανδρος ὁ Ἀθηναῖος

Menander of Athens and the New Comedy of Human Affairs

eul_aid: hps

Period: Ἑλληνιστική [Hellenistic](#)
Dialect: Κωμωδία Ἀττική [Attic Comedy](#)
Domain: Κωμωδία [Comedy](#)
Format: Ἑμμετρος [Verse](#)

Menander was an Athenian comic playwright who lived from approximately 342 to 290 BCE during the Hellenistic period. He was born into a wealthy family and is said to have studied under Theophrastus, a philosopher and student of Aristotle. Menander was a friend of the governor Demetrius of Phaleron, an association that may have caused him political difficulty. According to ancient accounts, he died by drowning in the harbor of Piraeus.

He was the leading figure of New Comedy, a style that shifted focus from political satire to comedies about domestic life, romantic entanglements, and character types. Menander was extraordinarily prolific, credited with composing over 100 plays, though only titles survive for most. For centuries, his work was known mainly through fragments and Roman adaptations. This changed dramatically in the 20th century with major papyrus discoveries that recovered large portions of his plays.

His only complete surviving play is *Dyskolos*. Other significantly preserved works include *Samia*, *Aspis*, and *Epitrepontes*. According to modern scholars, Menander's historical importance is immense. His plays were celebrated in antiquity for their realistic characters, sophisticated plots, and use of everyday language. Roman playwrights Plautus and Terence adapted his works, making him a foundational influence on the Western comic tradition. The rediscovery of his texts has restored his reputation, allowing direct appreciation of his intricate storytelling and humane portraits of Athenian society.

Works (43)

- Φάντασμα · [Apparition](#) · 110 passages
- Διαιτησία · [Arbitration](#) · 897 passages
- Καρχηδόνιος · [Carthaginian](#) · 33 passages
