

Ῥοῦφος ὁ Ἐφέσιος

## Rufus of Ephesus on the Human Body

eul\_aid: ojc

**Period:** Ῥωμαϊκή [Roman](#)  
**Dialect:** Κοινή τεχνική [Technical Koine](#)  
**Domain:** Ἰατρική [Medicine](#)  
**Format:** Πραγματεία [Treatise](#)

Rufus of Ephesus was a Greek physician who lived and practiced medicine during the reign of the Roman emperor Trajan, around the late first and early second centuries CE. He was born in the city of Ephesus, in what is now Turkey.

While the details of his life are sparse, his extensive writings show he had a thorough medical education. His precise philosophical school is unclear; his work shows strong influences from the Hippocratic tradition, and he is sometimes associated with the Methodist school, but he remains difficult to categorize.

He was a prolific author, though only a portion of his works survive, often in fragments or in later Arabic and Latin translations. His known writings cover a wide range of practical medical topics. These include an anatomical guide *On the Names of the Parts of the Human Body*, a treatise on diagnosis titled *Medical Questions*, and works on specific ailments like *On Melancholy*, *On Gout*, and *On Diseases of the Kidneys and Bladder*. He also wrote a handbook for non-specialists called *For Laymen* and even a text advising physicians *On the Purchase of Slaves*.

According to modern scholars, Rufus was a highly respected and practical physician in his time. His significance lies in his role as a clear interpreter and transmitter of earlier medical knowledge, particularly Hippocratic ideas, during the Roman period. His emphasis on patient interrogation for diagnosis and his detailed anatomical descriptions are considered notable contributions.

Although later overshadowed by the physician Galen, Rufus's works were translated and studied for centuries, influencing both medieval Islamic and European medicine. His writings provide a valuable window into medical practice in the ancient world.

### Works (7)

- Ἰατρικαὶ Ζητήσεις · [Medical Questions](#) · 58 passages
- Περὶ Ὄστέων · [On Bones](#) · 41 passages
- Περὶ Νεφρῶν καὶ Κύστεως Παθῶν · [On Diseases of the Kidneys and Bladder](#) · 178 passages
- Περὶ Μερῶν τοῦ Ἀνθρωπίνου Σώματος · [On Parts of the Human Body](#) · 61 passages
- Περὶ Σατυριάσεως καὶ Γονορροίας · [On Satyriasis and Gonorrhea](#) · 49 passages
- Περὶ Ὁρων τοῦ Ἀνθρωπίνου Σώματος · [On the Terms of the Human Body](#) · 198 passages
- Σύνοψις περὶ Σφυγμῶν · [Summary-Pulses](#) · 45 passages
